## 1 Identification

- · Product identifier
- · Trade name: S11 P.U. THINNER NORMAL
- · Article number: S11
- · Application of the substance / the mixture refer to the relevant Technical Data Sheet
- Details of the supplier of the safety data sheet
   Manufacturer/Supplier:
   General Paint Co. SAL
   P.O. Box 7623
   Beirut
   LEBANON

· Classification of the substance or mixture

info@hymax.biz

- Information department: Product Safety Department
   Emergency telephone number: 1-800-535-5053 contract number (89244)
- Safety Department

## 2 Hazard(s) identification

 GHS02 Flame

 Flam. Liq. 3 H226
 Flammable liquid and vapor.

 Image: Constraint of the second structure of the s

The product is classified and labeled according to the Globally Harmonized System (GHS).

· Hazard pictograms

· Signal word Warning

 Hazard-determining components of labeling: n-butyl acetate

## 3 Composition/information on ingredients

· Chemical characterization: Mixtures

· Description: Mixture of the substances listed below with nonhazardous additions.

## · Dangerous components:

| •          | •  |                   |
|------------|--|-------------------|
| 123-86-4   | n-butyl acetate                          | >25- <i>≤</i> 50% |
| 108-65-6   | 2-methoxy-1-methylethyl acetate          | >10- <i>≤</i> 25% |
| 64742-95-6 | Solvent naphtha (petroleum), light arom. | >10- <i>≤</i> 25% |
| 1330-20-7  | xylene                                   | >10- <i>≤</i> 25% |

## 4 First-aid measures

## · Description of first aid measures

- · General information: Immediately remove any clothing soiled by the product.
- After inhalation: In case of unconsciousness place patient stably in side position for transportation.
- After skin contact: Immediately wash with water and soap and rinse thoroughly.
- · After eye contact: Rinse opened eye for several minutes under running water.
- After swallowing: If symptoms persist consult doctor.
- · Information for doctor:
- Most important symptoms and effects, both acute and delayed No further relevant information available.
- Indication of any immediate medical attention and special treatment needed No further relevant information available.

## 5 Fire-fighting measures

- · Extinguishing media
- · Suitable extinguishing agents:
- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam. • For safety reasons unsuitable extinguishing agents: Water with full jet
- Special hazards arising from the substance or mixture No further relevant information available.
- · Advice for firefighters
- · Protective equipment: No special measures required.

## 6 Accidental release measures

- **Personal precautions, protective equipment and emergency procedures** Wear protective equipment. Keep unprotected persons away.
- Environmental precautions: Do not allow to enter sewers/ surface or ground water.
- *Methods and material for containment and cleaning up:* Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).

## 7 Handling and storage

- · Precautions for safe handling Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols.
- · Information about protection against explosions and fires: Keep ignition sources away - Do not smoke. Protect against electrostatic charges.
- · Conditions for safe storage, including any incompatibilities
- · Storage:
- · Requirements to be met by storerooms and receptacles: No special requirements.
- · Information about storage in one common storage facility: Not required.
- Further information about storage conditions: Keep receptacle tightly sealed.
- · Storage class: 3
- · Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

· Additional information about design of technical systems: No further data; see item 7.

· Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

· Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

· Eye protection:

Tightly sealed goggles
